# Low Energy Low Carbon Architecture: Recent Advances & Future Directions (Sustainable Energy Developments)

## Synopsis

Providing a complete and in-depth overview of the available knowledge in the area of low energy and low carbon architecture. The scope of this edited book includes several important topics ranging from chapters giving a broad view of the progressing models in ecologically responsible environments to other chapters focussing on recent advances in design strategies and building technologies in low energy heating, cooling, daylighting, materials, and building sustainable systems. Two other essential topics are covered, providing a link between theory and implementation: sustainable energy policies/standards and performance modeling in low energy architecture. Finally, the book will give the readers insight into the future of low energy and low carbon architecture in the beyond-green era and discussed in the broader context of the progressing theories of regenerative design.

## Book Information

Series: Sustainable Energy Developments (Book 12)

Hardcover: 348 pages

Publisher: CRC Press (June 8, 2016)

Language: English

ISBN-10: 1138027480

ISBN-13: 978-1138027480

Product Dimensions: 0.8 x 7 x 10 inches

Shipping Weight: 1.7 pounds (View shipping rates and policies)
