# Mastering The Internet, XHTML And JavaScript (2nd Edition)

Synopsis

The second edition of this popular text has been redesigned to accommodate the new Internet concepts that are quickly developing. Mastering the Internet XHTML and JavaScript strikes a delicate balance between subject breadth and depth, and between generic and practical aspects of the Internet. Professionals can tap into the summary and 'Frequently Asked Questions' sections for quick consultations. It integrates two essential topics of the Internet in one source, presenting the fundamentals of the Internet and its scripting tools (XHTML and JavaScript) to help users understand and effectively utilize the Internet's dynamic nature.   The text presents general concepts that can be applied to a wide variety of software; its examples and exercises use the leading e-mail tools (Eudora, Hotmail, Outlook Express 6.0, Yahoo mail, Netscape 4.8 Messenger, Netscape 7.01 mailer, and Opera 7 M2); as well as the leading HTML editors (FrontPage 2002, Composer 7.01, and AceHTML 5.0). It effectively covers two leading servers: Apache server version 2.0.45, and Tomcat server version 4.1.24, both from the Apache group.   For professionals needing a self-teaching book that provides them with quick answers to questions they may have during the development of Web sites and Web pages.

Customer Reviews

I read this book for a class, and was disappointed. The writing could have been a lot clearer, and there were numerous typos which is very problematic when you are trying to read/learn code)

The price is very afforable.It just takes too long to get the package.

Nice cut and paste job of basic information freely available out on the web. Don't waste your money..

Good product.
