Customer Reviews

I just took the clep exam and passed with a 68. HOWEVER!!! before you get excited and buy this book I felt grossly unprepared based on the material in this book. It was much harder then the practice test would lead you to think. If I had not researched on my own I don't believe I would have passed. My study plan. ...(over a period of about 4 weeks) I simply read the book completely then took the first test and got a 51. studied the "explanations" built into the test and then took test 2 and

got a 60. Then I decided to make flash cards for all the questions within test one and two until I knew all of them cold. Then took test three and made a 80. I made more flash cards from test three. Then I checked out of the library a documentary on the civil war, and one on slavery. After that, I learned all the presidents, and what they did during their term in office (outside of this book of course). What was on the test... When I walked in I felt ready, yet when I saw the first question I thought "I'm in trouble." There were at least 10 questions about the "antebellum" period which is not covered in the book. There were 5-8 questions about Indian chiefs and what tribe they lead, and where they were in the US, and "what was 'x' tribe leader famous for saying". NOT one word in this book or on the three test about Indian chiefs. Several questions on women's rights at different periods. There were also a lot of questions about books, authors and social life during the pre-civil war time and pre-revolution period then I would have ever expected. While I was studying I kept notes on where I got the information in case I wanted to go back.
